Overall Vacancy

Economy

Through August of 2018 the economy in Polk County, which includes the Lakeland industrial market, continued its upward momentum, adding +5,400 jobs for an annual growth rate of 2.5%. The unemployment rate fell by -60 basis points (bps) over the last 12 months to 4.3%. Most industrial-using employment sectors gained jobs throughout Polk County. The Trade, Transportation, & Utilities sector, added +1,100 new positions for an annual increase of 1.9%. The region's robust consumer base benefited the industrial market with many in- and new-to-market users taking space to meet consumer demand.

Market Overview

The overall vacancy rate in the third quarter decreased by -20 bps in the last 12 months and has remained below 6.0% for 28 consecutive quarters. This was in part attributed to the Southeast submarket's lead in occupancy gains, with a -480 bps drop in the vacancy to 4.8%. The overall rental rate decreased -1.4% year-over-year from \$5.76 per square foot (psf) to \$5.68 psf, triple net. This was primarily due to limited Class A availabilities in the market. In contrast, the Southeast submarket led in rental rate gains with an annual increase of +21.5% in asking rents to \$9.63 psf, bolstered by nearly 100,000 square feet (sf) of higher-priced available flex space and less than 25,000 sf of availabilities in lower-priced warehouse/distribution buildings.

Leasing activity in Lakeland cooled significantly when compared to 2017 historic figures, which was owed to tenants leasing over 1.2 million square feet (msf) last year. The softening in leasing throughout 2018 is due to a lack of large 100,000+ sf blocks of space in the market. In contrast, overall absorption continued its positive trend for the 20th consecutive quarter. The 1.3 msf of positive absorption year-to-date was more than double year-end 2017 figures.

Lakeland remained one of the top industrial markets for new construction in the Tampa Bay region with 1.2 msf of distribution space delivered this year. Scannell Properties' completed Best Buy's new 650,808-sf built-to-suit distribution center in the Northwest submarket. Additionally, Center State Logistics, a 605,920-sf distribution center delivered with Quaker/Gatorade as a single tenant building user. At the close of the third quarter over 1.5 msf was under construction. Blue Steel Development broke ground on the first phase of Key Logistics Center, which includes a 520,000-sf built-to-suit distribution center for DHL and a 491,000-sf speculative development. High demand for new big box space, coupled with overall lack of availability, will continue to justify growth in Lakeland's industrial product.

Outlook

The Lakeland industrial market posted strong market fundamentals through the first nine months of 2018. Tenants continued to seek out Lakeland's lower rental rates, plethora of new product, and superior access to the I-4 corridor. Cushman & Wakefield anticipates the Lakeland industrial market's key dynamics to remain steady through the remainder for 2018 and into 2019.
